4. If shedoesn't send.....(not send) us data on time we will lose to our competitors.

II Make the opposites of the following words by adding the appropriate prefix (3).

1. formatted
2. function
3. sufficient ..

II Make the opposites of the following words by adding the appropriate prefix (3).

1. volatile
- 2.suitable
- 3.appropriate

III Make opposites of the following words by adding the appropriate prefix (5)

- 1 correct
- 2 encrypt
- 3 adequate
- 4 economical
- 5 sufficient

3 Make opposites of the following words using one of the prefix.

- 1 correct -
- 2 detected -
- 3 balance -
- 4 proportionate -
- 5 compress -

6 effective -
7 consistent -

IV Rewrite the sentences by putting verbs in the passive where appropriate (8).

You shouldn't place objects in front of the air inlet. And you must keep inlet grille free from obstructions, and clean it regularly.

If there is a damage, you have to stop the blower immediately. Foreign bodies entering the duct cause serious harm.

Before you start the blower, it's important to ensure that external vents at the end of the air-intake duct are open. When you open the vents, you should fully extend the adjusting handle.

IV Rewrite the sentences by putting verbs in the passive where appropriate (8).

Neural networks look at the rules of using data. As a result, the software continually analyses value and compares it to the other factors, and it compares these factors repeatedly until it finds patterns or rules.

The software then looks for other patterns based on these rules or sends out an alarm when it hits a trigger value.

VI Rewrite the sentences by putting verbs in the passive where appropriate (10).

Neural network look at the rules of using data. As a result, the software continually analyses value and compares it to the other factors, and it compares these factors repeatedly until it finds patterns. People know these patterns as rules. The software

than looks for other patterns based on these rules or sends out an alarm when it hits a bigger value. Clustering divides data into groups based on similar features or limited data ranges.

7 Re-write the following text using the passive whenever possible.

People use SMTP to transfer messages between one mail server and another. Email programs on PCs also use it to send mail to the server. SMTP is very straightforward, providing only facilities to deliver messages to one or more recipients in batch mode. Once programs have delivered a message, they can't recall it or cancel. They also delete it from the sending server once they have delivered it. SMTP uses 'push' operation, meaning that sending server initiates connection rather than the receiver.

II Complete the passage using either active or passive forms of the verb (10).

Whenever a disaster (happen) somewhere in the world, reporters and photographersare sent.....(send) there to interview people and take photos. The news reportscan be sent.....(can/send) by e-mail or over the phone and rolls of film ...are rushed back.....(rush back) to the office to be developed. The computerprints..... (print) out the page of news onto a piece of clean film whichis laid..... (lay) on a light-sensitive plate andexposed..... (expose) to a brief flash of light. A plateis made..... (make) for each page of the newspaper,wrapped.....(wrap) around a roller on the printing press andcoated..... (coat) with ink.

V Rewrite these sentences in the passive (3).

1. You have to switch off your mobile phone during the flight.

.....

2. The CEOs have discussed the proposal.

-

3. They are building a new extension.

-.....

V Rewrite these sentences in the passive (3).

1. You have to explain the procedure to me.

.... .

2. I have already given a set of diagrams.

.....

3. Someone will demonstrate the game to the children.

.....

6 Re-write these sentences into the passive.

1 We have made the decision.

2 He is preparing the documents now.

3 Some experts placed too much hope on middle classes.

4 You must return all tenders and supporting documents by 31 March.

VII Complete the text below using one of the article (9).

..... businesses need to work out how to use power of social media to ??
cooperation from both employees and customers to get best results.

.... clear example is growing trend of forward-thinking companies to use their
community of customers to help other customers who have problem with
product.

VII Complete the text below using one of the articles (9).

Not enough companies are using social tools to motivate their own employees.
Internet tools such as these can help companies solve problems.

Take for example case of car manufacturer. Some of company's cars were not
performing well in most challenging environments, such as deserts.

By using social network on the Internet, businesses got employees from different
parts of the world to look at the problem and collectively collaborate.

4 Complete the text below about filming of a television ad using one of the article.

Ronaldinho smashed window incenturies-old cathedral of Santiago de Compostela while filmingadvert for television today. Luckily for Barcelona star, window was onlysmall, modern addition to Spain's famous cathedral in Galicia. The Brazilian blundered after being asked to try scissor-kick beneath. 'I asked Ronaldinho to hit ball as hard as he could and he had bad luck to hit window'.

My brother Michael used to be a teacher in a village school near Cambridge. The job (1. be)_____ interesting but tiring and not very well-paid. He (2. spend)_____ most of his free time on his hobby – collecting and repairing antique clocks. Then he (3. have)_____ an idea. The CBI (Confederation of British Industry) was helping people (4. start up) _____ by themselves. Why not go on a training course, apply for a loan and set up a small business? So he resigned from the school, (5. say) _____ goodbye to the children, and joined the unemployed. He obtained information from different sources, (6. take) _____ advice from an accountant, (7. leave) _____ the village and learnt all about the antique trade. Eighteen months later he had his own shop and (8. earn) _____ about 2,000 pounds a month. 'It was the best thing I ever (9. do) _____', he (10. say) _____.

4 Complete the text below about filming of a television ad using one of the article.

Ronaldinho smashed a window in the centuries-old cathedral of Santiago de Compostela while filming an advert for television today. Luckily for the Barcelona star, the window was only a small, modern addition to Spain's famous cathedral in Galicia. The Brazilian blundered after being asked to try a scissor-kick beneath. 'I asked Ronaldinho to hit the ball as hard as he could and he had the bad luck to hit the window'.

My brother Michael used to be ...A teacher in ...A village school near...(nije bilolinije za popuniti) Cambridge. ...The job was interesting but tiring and not very well-paid. He spent most of his free time on his hobby – collecting and repairing ...- antique clocks. Then he had ...AN idea. The (ovde je bilapraznalinja, trebalo je ubaciti clan) CBI (Confederation of British Industry) was ...- helping people start up by themselves. Why not go on ...A training course, apply for ...A loan and set up ...A small business? So he sent in his registration to ...THE school, said good-bye to ...THE children, and joined the(ovde je bilaprazna lija, trebalo je ubaciti clan) unemployed. He obtained ...- information from ...- different sources, took ...- advice from ...AN accountant, left ...THE village and(mozda je bilalinija za popuniti) learnt all about ...THE antique trade. Eighteen months later he has his own shop and was earning about 2.000 pounds ...A month. "It was ...THE best thing I ever did," he said.

XVI Translate the following sentences into English (5).

1. Kadaporukastignenasvoju destinaciju, onaprolazikrozistihsedammrežnihkomunikacionihslojevakaokada je poslana, ali u suprotnomsmjeru.

2. Jezik za označavanje hiperteksta (HTML) je skup kodova koji se uglavnom koriste za veb stranice, a koji kreira elektronske dokumente prema pravilima utvrđenim od strane standardnog generalizovanog jezika za označavanje (SGML).

3. Koja odlika izbjegava problem odlučivanja kako se svaka posebna vrsta podataka integriše i sinhronizuje u jednurađnu cjelinu?

4. Zbog svoje anonimnosti, internet pruža pravo okruženje za internetsko uhođenje, uznemiravanje ili zloupotrebu, uglavnom u sobama za ćaskanje.

5. Rudarenje podataka je jednostavno filtriranje velike količine neobrađenih podataka radi korisnih informacija koja kompaniji daju konkurentsku prednost.

VII Translate the following sentences into English.

1. Da biste pokrenuli veoma zahtjevne aplikacije trebaće vam brz procesor, mnogo RAM memorije i prostran disk.

2. Jedna od osnovnih motivacija za upotrebu OOP-a jeste rukovanje multimedijalnim aplikacijama u kojima su različite vrste podataka kao što je zvuk i video spakovane zajedno u izvršne module.

3. Roboti su sastavljeni od jakog metala, neprestano su svjesni i mogu lako da podnesu krajnosti okoline.

XII Translate the sentences into English (5).

1. Danas racunari u sistemima zastite rezultiraju sigurnijim okruzenjem, kod racunara u autima poboljsavajući nergetsku efikasnost.

2. Potreba da se razvije sistem obnovljive energije se smatra futurističkim tehnološkim izazovima baziranim na konceptima koji postoje odavno.

3. Djelovanje vjetra na solarni stub može također da proizvede silu uvrtnja.

VII Translate the following sentences into English.

1. Da bi ste porenuli veoma zahtjevne aplikacije trebace vam brz procesor, mnogo RAM memorije i prostran disk.
2. Jedna od osnovnih motivacija za upotrebu OOP-a jeste rukovanjem ultimedijalnim aplikacijama u kojima su različite vrste podataka kao što je zvuci video spakovane zajedno u izvršne module.
3. Roboti su sastavljeni od jakog metala, neprestano su svjesni i mogu lako da podnesu krajnosti okoline.

9 Translate the following sentences into English.

1 Obrnuti inženjering softvera može da pomogne da se poboljša razumijevanje izvornog koda za razvoj, održavanje i unaprijeđenje softvera, što pomaže kod određivanja i popravljivanja grešaka softvera ili ranjivosti.

2 Da bi prilagodio ovakvo ponašanje za svjetlost, Ajnštajnov teorija je predviđala da će se vrijeme i prostorni intervali istezati i skupljati dok neko putuje s većom brzinom.

3 Manja emisija, niže cijene goriva i smanjenja zagađenosti su prednosti koje upotreba alternativnog goriva može da ponudi da ublaži problem koje izaziva upotreba fosilnog goriva.

XI Translate the following sentences in English (3).

1 Dinamički kontrolni sistem potražnje se može graditi u električne aparate koji rade po principu radnih ciklusa.

2 Potražnja za električnom energijom varira i električne central moraju da se izboresavrhuncempotraznje.

3 Modem je uređaj koji prebacuje digitalne signale u analogne i obratno da bi omogućio računaru da prenosi i prima podatke..

XI Translate the following sentences in English (3).

1 Veoma je teško sacuvati električnu energiju u velikim količinama i koristiti je u inovativnoj tehnici da bi se pohranila električna energija tokom perioda slabije potražnje.

2 Dinamički sistem koristi avijaciju da aparat s radnim ciklusom ne zahtijeva stalno napajanje.

3 Ruter je poseban računar koji usmjerava poruke kada je nekoliko mreža povezano.

XIII Translate the sentences into English (6):

1. Sposobnost složenih računarskih uređaja da kontrolišu kompleksne operacije transformisala je način na koji se mnogi zadaci obavljaju. Počevši od naučnog istraživanja do proizvodnje potrošne robe.
2. Dramatično raspadanje motora aviona tokom leta izazvala je loše napravljena cijev za gorivo koja nije odgovarala standardima.
3. Do 2040. godine genetički inženjering i nanotehnologija će omogućiti da živimo 120 godina.

4. Kršenje sajber bezbjednosti je rezultat socijalnog inženjeringa čiji se napadi oslanjaju na manje tehnički zahtjevne tehnike prevaranata koji navode ciljanje žrtve da rade ono što oni žele.
5. Možete li mi reći da li ste ikada radili na sličnom projektu?
6. Postoji sve veća svijest o tehničkoj komponenti sajber bezbjednosti kao i o potrebi da se poboljša ljudski aspekt kako bi se umanjio rizik od potencijalnih napada socijalnog inženjering
11. Explain the terms Edutainment Expert system Telecommute Information superhighway
12. tabela i definicija za electronic i electrical engineering
13. pridjevi i imenice noun adjective therm thermal volt voltatic electricity electrical
14. Translate
 - a) Možete li mi reći koji faktori odlučuju da li je mjesto prikladno za vjetro farmu?
 - b) Koji tipovi računarskih sistema su dostupni ljudima na udaljenim lokacijama upotrebom elektronskih učionica ili salu za sastanke?

PRIPREMA – K1

- c) Umrezavanje je način omogućavanja inače nekompatibilnim sistemima da komuniciraju i dijele resurse.
- d) Bezbjedan sistem treba da obezbijedi nekoliko garancija kao što su poverljivost, integritet i dostupnost podataka, kao i autentičnost i neporicanje
- e) Do 2030. godine računari će postati efikasniji i moćniji u pogledu inteligencije i količine podataka koje mogu pohraniti.
- f) Pametne masine su dizajnirane da bi preuzele neke od osnovnih zadataka koje su prethodno obavljali ljudi čineći život malo lakšim i malo ugodnijim

15. Write a formal email(3) you cannot attend the meeting because you will be out of the office that day. write an email to your client David Gavino.

In your email:

- *apologise for not being able to attend the meeting (give date and time)
- *explain why you will be out of the office
- *suggest another day you could meet

XII Translate the sentences into English (5).

1. Danas racunari u sistemima zastite rezultiraju sigurnijim okruženjem, kod racunara u autima poboljšavaju energetske efikasnost.

Today, computers in security systems result in safer environments, computers in cars improve energy efficiency.

2. Potreba da se razvije sistem obnovljive energije se smatra futurističkim tehnološkim izazovom baziranim na konceptima koji postoje odavno.

The need to develop renewable energy system considers as futuristic technological challenge based on concepts that have long been in existence

3. Djelovanje jetr i solarni stub može takođe da proizvede silu u vrtanja.

4. Dramatično raspadanje motora aviona tokom leta je izazvalo loše napravljene cijevi za gorivo koje nisu odgovarale standardima.

The dramatic disintegration of jet engine during a flight was triggered by a poorly oil pipe which did not be as in standard

1 Complete the conditional sentences in the situations using the words in brackets.

1 A friend needs to call his partners to conference. (*offer to help*)

If you need **help** I **will call** your partners to conference.

(help / call)

2 A colleague can not make up his mind about a job offer. (*advice*)

If I **were** you, I **would take** the offer.

(be you / take the offer)

3 I missed the plane and was late for the meeting. (*regret*)

If I **hadn't missed** the plane, I **wouldn't have been** late.

(not miss / not be late)

10 What are some alternative ways of producing electricity?

11. Explain neural networks, clustering, decision trees, I just need....?
